CEO, GHANA
EXPORT PROMOTION
AUTHORITY (GEPA)

FOREWORD FROM CEO

Across the globe, technology and innovation continue to redefine how economies grow, businesses compete, and communities connect. They serve not only as drivers of digital transformation but also as powerful platforms for creativity, entrepreneurship, and inclusive economic development. At GITEX Nigeria 2026, we celebrate the ingenuity, ambition, and innovative spirit of African businesses while showcasing the vast potential of Nigeria and the wider African market in the global technology ecosystem.

The Ghana Export Promotion Authority (GEPA) is delighted to participate in this prestigious gathering of technology leaders, entrepreneurs, investors, innovators, buyers, and industry professionals. Our participation reflects Ghana's growing digital economy and its commitment to promoting innovative enterprises, technology-enabled services, and solutions capable of competing in international markets. From digital technologies and creative solutions to technology-enabled services, startups, and innovative business models, Ghanaian enterprises continue to demonstrate the capacity to transform ideas into impactful solutions.

Our presence at GITEX Nigeria 2026 goes beyond exhibition; it is about creating meaningful connections, fostering strategic partnerships, and opening new pathways for Ghanaian businesses to access regional and global markets. As Africa's technology ecosystem continues to expand, platforms such as GITEX provide an important opportunity to connect Ghanaian innovators with investors, technology partners, distributors, buyers, and other key stakeholders. Through these engagements, we seek to strengthen Ghana's position as a competitive hub for innovation, technology, and digital enabled services within Africa and beyond.

We extend our sincere appreciation to the organizers of GITEX Nigeria for creating this dynamic platform for collaboration, investment, and knowledge exchange. We warmly invite all visitors to engage with Team Ghana, discover the innovative solutions on display, connect with our entrepreneurs, and experience the creativity, talent, and excellence that define Ghanaian enterprise.

Together, let us build stronger connections, unlock new opportunities, and advance an African technology ecosystem where innovation creates sustainable value, drives economic growth, and positions African businesses for greater success in the global marketplace.

CBI

Government of the Netherlands

**JULES VAN
SON.**

CBI,
PROGRAMME
MANAGER

FOREWORD FROM PROGRAMME MANAGER

CBI is part of the Netherlands Enterprise Agency and is funded by the Netherlands Ministry of Foreign Affairs. Our work is focused on supporting sustainable and inclusive growth in our partner countries through market-driven approaches. With over 50 years of experience, we have worked with more than 10,000 SMEs from 70 countries, connecting them to buyers or partners in the European market. We collaborate with over 250 business support organisations and our extensive network of international experts to bring a wide range of expertise to our projects. This enables us to effectively support sustainable, long-term change at the sector level.

For more information about CBI, go to:

<https://www.cbi.eu/>

Ghana has potential in the IT sector. The country has many young, English-speaking professionals with digital skills, and it is steadily building a name as a growing outsourcing destination. There is more and more demand in Europe and other international markets for IT and outsourcing services.

Through the Ghana IT Youth project, CBI supports SMEs, the Ghana Export Promotion Authority (GEPA) and the Kwame Nkrumah University of Science and Technology (KNUST) to strengthen the IT sector and improve youth employment. The project focuses on building company capacity and facilitating access to international markets.

This collaboration is anchored in a Memorandum of Understanding (MoU) between CBI and GEPA, under which joint initiatives such as participation in GITEX Nigeria are developed. CBI is honoured to collaborate with GEPA in creating opportunities for Ghanaian IT companies to connect with international markets and partners. The project focuses on building company capacity and facilitating access to international markets. Ghanaian Tech companies are open for business, partnerships and collaborations. Discover Ghana's high-quality, innovative IT sector through the companies coached by CBI. If you're seeking a trustworthy and knowledgeable IT services partner, with a strong understanding of data privacy and security requirements across Africa and Europe, we invite you to connect with us.

Visit us at GITEX Nigeria, our companies will be present at the event on 2&3 September 2026, Tech Expo Lagos. You can find us in Hall 2, Stand H2-B30.

We are the BPO and Back Office business provider of choice in Ghana. We do everything related to:

- Call Centers and Customer Support Services,
- Digitalisation,
- Data Analytics Services,
- Data Entry Services and,
- Software Development.
- Software Support Services

We consult on operations process improvement. We are Six Sigma experts!

For monitoring online trade transactions between merchants and customers, ensuring efficient tax collection.

COLLATERAL REGISTRY SYSTEM

Allows customization for registering security interests over movable and immovable properties.

LOCAL GOVERNMENT MANAGEMENT SYSTEM

THE DIGICOAST

The Digicoast is a technology services company operating from Accra, Ghana and Austin, Texas, USA. It positions itself as a strategic partner rather than a transactional vendor, delivering technology that is effective and closely aligned with each client's business objectives spanning custom software development, cybersecurity, IT consulting, management systems certification, professional training, and emerging areas such as 3D and game development.

Mission & Approach

The Digicoast describes itself as "more than just a service provider" a hands-on strategic partner that ensures the technology it delivers is both effective and aligned with client goals. This partnership model runs through its software delivery, security, consulting, and training work alike.

Products & Services

Software Development

- Custom enterprise-level software, AI, web, and mobile applications
- Workflow automation tools
- ERP implementation and custom ERP development
- Legacy system upgrades, maintenance, and ongoing support

Cybersecurity

- Threat management, risk assessments, and security consulting
- Vulnerability assessments and penetration testing for web, mobile, and embedded systems
- Security management design, implementation, and maintenance of Information Security Management Systems (e.g. ISO 27001, SOC 2)
- Managed security services and ongoing monitoring
- Data protection and privacy

IT Consulting

- Digital transformation strategy
- Infrastructure planning and optimization
- Day-to-day technical support

Management Systems Audit & Certification

- Certification against ISO standards, SOC 2, TISAX, and other international compliance frameworks
- Certification readiness and audit support

Professional Skills Training

- Authorized training partner for industry-recognized cybersecurity certifications
- Programs include ISO/IEC 27001 Lead Auditor/Implementer, CompTIA PenTest+/Security+, Information Security Risk Management, Cybersecurity Foundation, and PIMS
- 3D & Game Development

- 3D and game development, real-time rendering, and immersive applications

Tech Talent & Skills Development

- Tech talent sourcing, bootcamps, and a 'skills factory' model for building job-ready digital talent
- Staff outsourcing and nearshore/offshore delivery

Our AI Services

AI-Powered Automation

Streamline repetitive tasks and boost efficiency with intelligent automation.

Features:
Process optimization, workflow automation, robotic process automation (RPA).

Benefits:
Reduce costs, save time, minimize errors.

Use Cases:
Customer support chatbots, invoice processing, inventory management.

Data Analytics & Insights

Turn raw data into actionable intelligence with advanced AI analytics.

Features:
Predictive modeling, real-time dashboards, trend analysis.

Benefits:
Informed decisions, uncover opportunities, forecast trends.

Use Cases:
Sales forecasting, customer behavior analysis, risk assessment.

Natural Language Processing (NLP)

Enhance communication and extract meaning from text and voice data.

Features:
Sentiment analysis, text summarization, language translation.

Benefits:
Improve customer engagement, automate content analysis.

Use Cases:
Social media monitoring, virtual assistants, document processing.

Computer Vision

Leverage AI to interpret and act on visual data with precision.

Features:
Image recognition, object detection, facial recognition.

Benefits:
Enhance security, improve quality control, enable innovation.

Use Cases:
Surveillance systems, product defect detection, augmented reality.

Custom AI Development

Build bespoke AI solutions tailored to your specific goals.

Features:
Machine learning models, API integration, scalable architecture.

Benefits:
Fully customized, future-proof technology.

Use Cases:
Industry-specific applications, proprietary AI tools, R&D support.

mNotify Limited is a Ghanaian company with expertise in Value Added Services, licensed by the National Communication Authority. We develop AI-powered customer Engagement Solutions to help organizations effectively engage their audience.
