# About CBI

## Meet quality suppliers from Central America, Jordan and Moldova

**Are you interested in discovering new markets? The Centre for the Promotion of Imports from developing countries (CBI) can put you in touch with reliable, certified suppliers equipped to do business with a European partner. At Fruit Logistica, CBI will be presenting 32 carefully selected companies from Central America, Jordan and Moldova. Each of these companies has received individual coaching from a CBI sector expert. The suppliers offer a diverse range of fresh fruits and vegetables.**

## Central American suppliers ready for the European Market

At Fruit Logistica, CBI will present 12 companies from Costa Rica, El Salvador, Guatemala, Honduras and Nicaragua that are now ready to enter the European Market. The companies offer an interesting range of products, from fruits like papayas, mangos and limes to vegetables like okra, mini vegetables, sugar snaps, mangetout, roots and tubers, as well as appealing organic products such as ginger, sweet potatoes and pitahayas (dragon fruit).

Due to their rich volcanic soils, microclimates and experienced agricultural labour force, Central American countries are a source of high-quality produce during the fall and winter season. Many of

the exports currently go to the USA, but these countries offer numerous products that appeal to the European market as well, especially considering the Association Agreement that was signed between the EU and the Central American region in 2012. Among other things, this agreement has eliminated most import tariffs and has improved conditions for trade. Within its Connecting Central America Programme, CBI supports SMEs and cooperatives in becoming more competitive on the European market. The project is co-financed by the European Union and coordinated by SIECA.

Visit the CBI companies from Central America here:

Hall 25/C-14 (Suppliers from Costa Rica)

Hall 25/B-02 (suppliers from Guatemala)

Hall 26/C-13 (suppliers from El Salvador, Honduras and Nicaragua)

## Quality products from Jordan

Jordan has competitive advantages as a supplier of fresh fruits and vegetables, in particular because of the long production season in the Jordan Valley and its proximity to Europe. At Fruit Logistica, CBI will present eight different Jordanian companies that produce or trade a variety of quality fruits and vegetables, and especially dates. These companies have been carefully selected as participants in CBI's Jordan Fresh Fruits & Vegetables

Programme. Tailored technical assistance and market entry support will make them reliable suppliers of high-quality, certified and healthy food with increased market access. In addition, CBI is increasing the capacity of the Jordan Exporters and Producers Association (JEPA) so they can take a leading role in export promotion activities, such as trade fair participation and trade missions, and be a true advocate representing the entire Jordanian fruits and vegetable sector.

Visit the CBI companies from Jordan here:  
Hall B, CityCube/C-06

### **Moldova, taste makes the difference!**

Moldova is a fertile country with a long tradition of fruit production. Fruits grown in this country include apples, cherries, grapes, plums and other stone fruits. All of these will be presented at the Moldova stand at Fruit Logistica 2020. Together with the International Finance Corporation (IFC), CBI supports 19 SMEs, of which 12 produce fresh fruits and 7 produce processed fruits or honey. In Moldova, CBI works with local sector association Moldova Fruct, which aims to promote the Moldovan fruit sector to international buyers and support the development of fruitful business relationships.

Hall 7.2B/B-04

### **About CBI**

CBI connects small and medium-sized enterprises (SMEs) in developing countries with the European market and is recognised worldwide as a leading force in export development. CBI develops strategies on a number of levels that address export coaching for businesses. Firstly, we have strategies for coaching SMEs to ensure that their internal and product processes comply with European market standards and OECD Guidelines. Secondly, we help SMEs calibrate their tailor-made export strategy to the European market, in addition to helping them build and maintain a network here.

# Tropifoods

Hall 25/C-14

**Tropifoods is a family owned business that has been exporting quality products for 30 years to United States, Canada and Europe. The company is oriented to produce and promote agricultural production, focused on a high quality, destined to satisfy the requirements of the ethnic markets.**

Quality and food safety of the products as well as punctuality in deliveries, are benefits that their customers receive and that allows customers to achieve competitive advantages when they buy Tropifoods' products. The company takes special care of each of the different stages of the business chain, from the process of sowing, harvesting, washing, packing, loading, internal transportation and international transport.

Tropifoods is one of the first companies with the Essential Costa Rica certification that shows their commitment with their country and the world to develop the best products (100% from Costa Rica) with social and environmental commitment. The company works with more than 400 producers that ensure a quality product and year-round availability in the production period (in seasonal products). Tropifoods also works with scheduled production according to our customer's needs.

**Sabroso Tropics has an own packing plant and family-owned farms, consisting of 120 hectares of lime orchards and 80 hectares of tangerine orchards.**

Sabroso Tropics SA de CV, owned and operated by the Menjivar family is a Salvadorian exporting company with the highest standards of quality, with full control of the product from picking to packing, all while ensuring a never broken cold chain.

The Menjivar family and Sabroso Tropics work very hard to maintain the water springs of the surrounding areas. There are 60 hectares of designated untouched forest on their lands for the preservation of the water springs. With this effort the company is able to irrigate all their fields with water springs born in their own land.

# Agroindustrias del Trópico

Hall 25/B-02

**DFT – Agrotropic (Distribuidora de Frutas Tropicales – Agroindustrias del Tropic) is a family owned company established in 2000.**

DFT grows, packs and exports fresh mangoes to the United States of America (California, New York and Florida), Canada, Chile and Europe (the Netherlands and Spain). DFT's orchards and packing house are located 200 kilometers to the southwest of Guatemala City on the Pacific Coast of the country, near the port of Champerico, in Retalhuleu. Under state grown production, DFT grows all of the exported mangoes of the varieties Tommy Atkins, Ataulfo, Kent and Keitt. This provides excellent quality control along the crop cycle. To the date, DFT employs 65 permanent staff and 400 eventual personnel during the harvest season from March to May. With more than seventy thousand mango trees under production, DFT is on the biggest grower in Central America, with the capacity to produce more than 1.5 million boxes of fresh mango per season.

Following the growing plans of the company, a new plant was built in 2016, designed to produce IQF mango chunks, mango puree and multiple frozen fruits as bananas and plantains.

Abu Ayyash Farms family has mastered the art of growing natural wholesome dates. We strive to achieve unparalleled quality that exceeds our customers' expectations. Abu Ayyash Farms oversee all operations from harvest to packaging to distribution hence our slogan: "From the farm to the customers' hands". Enjoy a wide variety of dates straight from our family-run farms to your table. Dates are our family's legacy. Exceptional quality is our promise.

All our dates are grown at the heart of the Jordan valley which ensures every pack of Abu Ayyash Medjoul Dates of the highest quality. Post Harvest is one of the most critical processes in the production of medjoul dates where we focus on sorting our medjoul dates into three main categories: size, lose skin and moisture content. We use best practices of hygiene and quality control to ensure every pack meets our customers expectations.

# Abu Sido Farms

Hall B, CityCube/C-06

Abu Sido Farms stand today as Jordan’s market leaders in the production and export of premium high-end vegetables. To-date, more than 250 hectares of land, located in Jordan Valley, are dedicated for the development and production of a wide range of produce based on market demand, innovative research and contract farming.

The farm sits 260m below sea level in the most fertile areas of Jordan Valley, where warmer temperatures allows to have longer seasons of production and higher quality produce.

Abu Sido Farms offers:

- 50 years of agricultural growth, innovation & excellence.
- 1,500 Greenhouses
- 250 hectares of land utilized
- 25 farm locations in a radius of 10 km
- More than 600 multinational workers.
- + 15,000 tons of vegetable produce per year.

# Blume Agricultural

Hall B, CityCube/C-06

Palmera Dates (Blume Agricultural) in Jordan, established in 2019 as the culmination of previous joint ventures between Alfoah Company and The Blume Group for Agricultural Investments in Jordan over the past two years, is a unique model of public-private sector partnership in The United Arab Emirates and the Hashemite Kingdom of Jordan, where Palmera works in partnership with the King Abdullah II Fund for Development and Al-Haq Foundation in The Hashemite Kingdom of Jordan on several strategic levels to support the agriculture sector in the Kingdom, particularly the Mejdoul Palm sector by facilitating direct access for farmers to international markets through Alfoah distribution network in 45 countries around the world and on absolute commercial basis.

Palmera aims to reach approximately 10,000 tons of Mejdoul dates collection annually in Jordan within the next seven years and promote them around the world while working to achieve better value for the farmers, shorten the working capital cycle and reduce the costs needed to share benefits and raise the level of the final product.

Munir Abu Judom wanted to grow a product as unique as the area it is grown in. “5 Dates” Medjool dates are unlike any other commercial dates, they are grown specifically for those with distinctive taste.

In particular; these are the exact Dates to satisfy your sweet tooth, while providing you with the required energy, vitamins and minerals to maintain your health.

Straight from our palm plantations, comes our perfect Medjool date with rich flavor, creamy texture and exceptional taste.

Fresh Time is a group of agricultural producers associated with a common goal of promoting the highest quality of fruit with a great taste. Cultivate dearily tastiest varieties of apples, pears and cherries according to the most advanced technologies imported from Italy, Holland, Belgium and the USA. We have the most modern orchards, which are fully equipped with an irrigation system, anti-hail protection and anti frost protection system.

Our fruits are grown with great love. They are protected in the best way from natural disasters and pests. We use the most inoffensive methods of protection because we are cooperating with the world's leading company in plant protections. Our land is in an ecologically clean area, surrounded by agricultural fields, forests and lakes.

More than 100 hectares of orchards give us annually about 4,000 tons of high-quality products that are exported to Russia, Middle East and Europe. Our variety of apples is Golden Delicious, Red Chief, Granny Smith, Jonagold, Gala. Also, we grow some variety of cherry like Regina, Kordia, Skeena, Penny.

We have established good and long-lasting relationships with our clients. We export to Russia and Middle Eastern countries. We sell apples for processing around 150 tons to Orhei Vit SRL.

Due to geographic positioning and soil quality we get a sweet and special taste for what we are known for and we have an edge over other countries. The spectrum of varieties, including Idared, Renet Simirenko, Florina, Golden Delicious, Gala, and Jonagold, provides for more than enough product to meet a buyer's needs throughout the marketing season.

Now we employ state-of-the-art intensive production technologies and starting up each year, providing higher yields and greater uniformity in size and color. New postharvest facilities that ensure the Moldovan apples are properly graded, stored, and packed for delivery to international customers on a timely basis.

# Smarta AS SRL

Hall 7.2B/B-04

Moldova

**Our story started more than 20 years ago in The North of The Republic of Moldova. In our family the love for fruits growing has been worn throughout the generations. In this way, Smarta Ltd was founded in 1999 by Anatolii Caduc who is currently the President of the company. In short time almost all the family members were integrated in the managing and apple growing process, and became a dynamic, professional and qualified team.**

Smarta owns 70 ha of apple orchard. The apples are harvested manually and stored in our cold storage rooms. Then sorted according to the size, color and quality, and packaged in accordance with the customer’s requirements.

Our orchards are located in The North of Moldova. The moderate continental climate and the fertile soils composition among with the higher temperatures in summer and softer winters give our apples a unique flavor, high sugar content as well as rich color and aroma.

We manage the product chain from nursery to sale, and this is the best way to assure the quality

“Discover the taste of Moldovan apples!”
