# Why source fresh fruit and vegetables from Central America?

What makes Central America and its fruit and vegetables sector so interesting for European importers? In addition to the strong regional development, suppliers from Central America have been entering European markets with qualified and certified products, offering a very reliable supply compared to other origins. In addition to guaranteed supplies, Central American exporters are loyal to their customers and interested in building durable, long-term relationships with their clients.

- **Reliability** is one of Central American suppliers' unique selling points. Buyers can rely on producers to establish supply programmes. The Central American producers are professional exporters, and they are used to working with European buyers.
- Growers in Central America have a strong focus on **quality** because they have to ship their produce over long distances. Plus, they handle all the packaging and transport to optimise product shelf life.
- When it comes to **varietal development**, growers in Central America take the European market into account when planning their future production and varieties to be grown.
- Many businesses throughout Central America already have **corporate social responsibility (CSR)** practices in place. CBI is helping them to promote these efforts and get the message across to customers.
- Exporters are willing to **invest in certifications** beyond the basics, like GLOBALG.A.P., which is now required across all of Europe.

## Meet reliable suppliers from Central America!

Connecting Central America presents 6 companies from Costa Rica, Guatemala, Honduras, Nicaragua and Panama that are ready to enter the European Market. The companies offer an interesting range of fruits and vegetables.

**Request a meeting with one of the companies now**

## Tropifoods

Tropifoods is a family owned business that has been exporting quality products for 30 years to United States, Canada and Europe. The company is oriented to produce and promote agricultural production, focused on a high quality, destined to satisfy the requirements of the ethnic markets.

Quality and food safety of the products as well as punctuality in deliveries, are benefits that their customers receive and that allows customers to achieve competitive advantages when they buy Tropifoods' products. The company takes special care of each of the different stages of the business chain, from the process of sowing, harvesting, washing, packing, loading, internal transportation and international transport.

Tropifoods is one of the first companies with the certification Essential Costa Rica that shows their commitment with their country and the world to develop the best products (100% from Costa Rica) with social and environmental commitment. The company works with more than 400 producers that ensure a quality product and year-round availability in the production period (in seasonal products). Tropifoods also works with scheduled production according to their customer's needs.

# Agroindustrias del Trópico

Agrotropic (Agroindustrias del Tropic) is a family owned company established in 2000.

Agrotropic grows, packs and exports fresh mangoes to the United States of America (California, New York and Florida), Canada, Chile and Europe (the Netherlands, UK and Spain). Agrotropic has operations in Guatemala and Nicaragua, with an excellent window of production. In Guatemala plantations and packing facilities are located 200 kilometers to the Southwest of Guatemala City on the Pacific Coast of the country, in Retalhuleu. In Nicaragua they are located in the province of Leon, 45 minutes from Managua, where the plantations and packing plants are located. Agrotropic grows mangoes of the varieties Tommy Atkins, Ataulfo, Kent and Keitt (both green Keitt and conventional Keitt). This provides excellent quality control along the crop cycle.

Agrotropic provides more than 7,000 tons of fresh mango during the harvest season from February to May. With more than one hundred thousand mango trees under production, the company is the biggest grower and exporter in Central America, with the capacity to produce more than 2.5 million boxes of fresh mango per season.

Following the growing plans of the company, a new processing plant was built in 2016 to produce IQF mango chunks, mango puree and various frozen fruits such as bananas and plantains.

## Products and quantity per year:

- Fresh mango (7.000 tons)
- IQF mango (1.000 tons)

## Certifications

- GLOBALG.A.P.
- Primus GFS
- Kosher

## Guatemala

AMADEO EXPORT, S.A.

# Amadeo Export

Amadeo Export is a company that has more than 40 years of experience growing and exporting fresh mangoes. They have their own mango plantations which are located in a privileged arid zone in Guatemala ensuring the best quality and color of the fruit. Additionally, they work with more than 100 growers and the fruit is packed in their own mango packing house.

Amadeo Export grows different mango varieties, including Tommy Atkins and Kent and Keitt. Their plantations have GLOBALG.A.P. certification and the packing plant is certified with PrimusGFS and SMETA-ETI assuring a sustainable and socially responsible production.

Amadeo Export is providing the best quality fruit, with a long shelf life. The consistency in quality for years of the good arrival of the fruit makes their clients recognize them as professionals with optimum fruit quality in the export of fresh mango.

Their mission is to supply a superior quality in the market and therefore have long-lasting commercial relationships in different markets like USA, Europe, Great Britain and Canada.

## Products and quantity per year:

- Mango (8.000 tons)

## Certifications

- GLOBALG.A.P.
- SMETA-ETI
- Primus GFS

## Guatemala

# Connecting Central America

The Centre for the Promotion of Imports from developing countries (CBI) connects you with reliable, high-quality suppliers equipped to do business with European partners. With the Connecting Central America initiative, CBI helps SMEs and cooperatives be more competitive in the European market. The initiative is co-financed by the European Union and coordinated by the Secretariat for Central American Economic Integration (SIECA).

## About CBI

CBI connects small and medium-sized enterprises (SMEs) in developing countries with the European market, in order to contribute to sustainable and inclusive economic growth. The CBI is part of the Netherlands Enterprise Agency and is mainly funded by the Ministry of Foreign Affairs of the Netherlands. Within the framework of the Central American Regional Economic Integration (INTEC) project, which is financed primarily by the European Union and coordinated by SIECA, the EU and the Ministry of Foreign Affairs of the Netherlands signed a cooperation agreement to jointly promote the advantages for Central American SMEs of the Association Agreement between the EU and Central America.

In this context, CBI executes the initiative “Connecting Central America” to support 60 Small and Medium sized Enterprises (SMEs) and cooperatives from Central America, between 2018 and 2021, in becoming (more) competitive in the European market.

**More information about the ‘Connecting Central America’ initiative:** [www.cbi.eu/projects/connecting-central-america](http://www.cbi.eu/projects/connecting-central-america) and [www.facebook.com/connectingcentralamerica](https://www.facebook.com/connectingcentralamerica).

## About the European Union

This project is funded by the European Union. The EU is a peace and solidarity project that is unique in the world, associating 28 Member States with values of freedom, democracy and solidarity. At the regional level, in Central America the European Union promotes the defense of human rights, including gender equity; supports issues of security and rule of law; contributes to the mitigation and adaptation to climate change and promotes employment, trade and investment.

## About SIECA

The Central American Economic Integration Secretariat (SIECA) is the entity in charge of promoting efforts to gradually reach the economic union of Guatemala, El Salvador, Honduras, Nicaragua, Costa Rica and Panama. With this, SIECA fulfills its objective of expanding the development options of the region and establishing closer links with the international economy. SIECA is based in Guatemala City and is the technical secretariat of the Council of Economic Integration Ministers (COMIECO) and the Council of Transport Ministers (COMITRAN).
