Partners

CBI implements its activities in close collaboration with local partners. Memoranda of Understanding (MoUs) were signed in the second semester of 2018 with some of these partners, in which roles and responsibilities of each partner are described. Partners are public (e.g. official Trade Promotion Organisations) or private (exporter associations, sector associations, Chambers of Commerce). In these partnerships, CBI contributes with EU market expertise (through experts, trainers and market research) and the organisation of events in Europe, while local partners in Central America contribute with knowledge of the local situation and a network in the local SME community, as well as the organisation of events in the region:
