

Don't we all
have a longing • a desire
A vision and a mission which requires
some guidance and guts
to find the glory
in unfolding new possibilities
and to write our story?

We do and we believe
that in order to succeed
and to achieve
our global goals and
to exceed them
we need narratives of a world
where makers are linked to markets
and where joy sparks
whenever a new level embarks

A world where true support is shown
Where the dream of one becomes our own
For knowledge is only power when shared
and we can only create sustainable growth
when we focus on feeling we work with care

But let us not forget where success truly origins
It's in the stress • the struggle • the daily huddle we live in
we seek opportunities where
sometimes
deception is found
and learn that
with your head in the clouds
you'll never get foot on the ground
Breaking through means give it your all
whether aiming for European markets
or staying regional
It is accepting that we might fail
before we prevail
It is learning • reaching • trying • teaching
Adapting to change that comes your way
It is gritting your teeth • while you believe and repeat
"it is only you who can build your business to stay"
It might start with one brick • one basket • one bean
but if you maintain motive • we co-create means

We embrace digitizations
to reach different nations
Voicing the needs of SME's

de Muze van Surze

Always room to agree and disagree
As long as we make sure
we not just see
but really meet

So we create demand • we implement and reinvent
Turn strategic intelligence
into planet proof plans
We manufacture dreams of our own design
by making sure economies are diversified
Communities can strengthen • identities are build
When forces are joined
more people become skilled

So we provide information and guide determination
Shining new light on our women world round
and future generation
As there is a power in including the youth
People who already have a voice
but need a mic
and an audience
like you

Together we are building
knowing when time and effort are gifted
an already beautiful potential can be lifted

We are here for it all
Every conversation
difficult • fun
up close and personal
For everyone
who already is
but
still wants to become
For the risk takers
The careful creators
and radical change makers
The goal getters who work together
to make our planet a whole lot better

Who work endlessly relentless
to pursue whatever they invision
Dare to enjoy a global transition
and by doing what they are great at
are making magic on their mission

de Muze van Surje

That is what drives us • at our core
it has been for over fifty years
and is now
whilst we are finding our new how
more relevant than ever before

Knowing there's always more than one perspective
we partner up to work as a collective
We embrace every new challenge
and ever evolving objectives
Because markets change
but when people listen
Every gap can be bridged
and become a blessing

So here's to a new era • a next level
a road we travel united
Finding ways to sustain that what excites us
Feeling there's still more to explore • export and expand
But that all start with
firsts and foremost
believing
you can.
